DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-6, drawn to a system for allowing a user to store data interactively, classified in class 380, subclass 270.
- II. Claim 7-15, drawn to a system for logging data, classified in class 713, subclass 161.

The inventions are distinct, each from the other because of the following reason:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility than invention II. Invention I describes a data accumulation system, capable of storing data interactively. Where as the invention II could be utilized in a system where all the data have already logged and user does not have any control over the stored data. See MPEP § 806.05(d).

Because the inventions I and II are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete and must indicate an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

A shortened statutory period for response to this action is set to expire **one month (not less than 30 days)** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
